

Features & Benefits

Deansteel has manufactured ballistic doors and frames for over 10 years, but due to increasing security threats around the world we've expanded our research and development of new ballistic products. Deansteel proudly introduces a **WOOD** door with the aesthetic quality that can virtually match any architectural decorative design. Attractive and elaborate designs can be manufactured with modification to the inner construction in order to meet specific ballistic ratings. Our doors are hinged on a steel frame and a matching wood casing can also be applied. The casing and steel construction are made to match the same luxurious appearance and ballistic resistance of the door.

All of our Wood BR products utilize a ballistic resistant core tested and certified to meet the full threat spectrum mitigated by Underwriters Laboratories Standards for Bullet Resisting Equipment (UL-752) and NIJ Standard 0108.01-Ballistic Resistant Protective Materials. The actual levels are shown on the left hand side of this document.

This innovative product line will be backed up by Deansteel's commitment to the highest quality products, attentive customer service, and "small business style" relationships. For all of your security needs trust Deansteel BRP.

UL 752

Level 1	9mm	3 shots
Level 2	.357 Magnum	3 shots
Level 3	.44 magnum	3 shots
Level 4	.30 Caliber	1 shot
Level 5	7.62mm	1 shot
Level 6	9mm	5 shots
Level 7	5.56mm	5 shots
Level 8	7.62mm	5 shots

NIJ 0108.01

Level I	.22 long Rifle	5 shots
	.38 Special	5 shots
Level II	.357 Magnum	5 shots
	9mm	5 shots
Level IIIA	.44 Magnum	5 shots
	9 mm	5 shots

Test Certification

Complete test reports certifying full compliance with the agency requirements listed above are available. Tests for our ballistic resistant core and frame assemblies were conducted by an independent testing laboratory.

Frames

Frame profiles can be custom engineered to suit your architectural needs. A wood trim can be applied over the frame face for a uniform wood finish.

Special woods such as Red Oak, Mahogany, Maple, White Oak, Birch, Mesquite, Walnut are readily available with many other premium hardwoods available on request.
